PROFIT IN CAPONS

Poultrymen and farmers' can double their profits by Caponizing their cockerels. The operation is very simple-the instructions so full and plain that any man, woman or boy, after careful reading the instructions will be able to perform the operation. It is highly successful from every point of view. The demand for Capons for exceeds the supply, the price per pound being twice as much as for ordinany chickens.

The object of Caponizing is to largely increase the weight of the fowl, causing them in many cases to grow as large as turkeys and weigh from 10 to 15 pounds, and to make the meat finer, and sweeter flavored more juicy and tender.

A rooster chasing around the yard will run off flesh almost as fast as put on. In the more quiet Capon the same amount of food goes to make flesh, bone and profit.

HIGH CLASS POULTRY EGGS
BUFF ORPINGTONS

This variety of poultry was originated in England in 1894, by William Cook, and but few, if any, varieties of poultry have so universall gained the prominance in so short a time as the BUFF ORPINGTONS. In some respects they favor the Buff Plymouth Rocks, but are larger and batter layers. They are buff throughout and breed real true to color: their bright red combs, lobes and wrattles make them very attractive.

Full grown cocks weigh 10 to 12 lbs., hens 7 to 9 lbs., each. Excellent winter layers, fine hatchers and mothers.

I have made arrangements with a reliable poultryman, who is a member of the National Single Comb Buff Orpington Club, which enables me to furnish eggs from strong and healthy farm raised stock at $1.50 per setting of 15.

Magnificent Seedlings.

I have a magnificent Seedling Potato grown from your hybridized seed, and have raised over 400 bushels. A Prominent Seedsman wants to introduce them and is trying to buy me out. I have six more Seedlings that are more than good.

E. A. Goodspeed, Orono, Co. N. Y.

Never Saw So Many Kinds.

Your Potato Seed is a success and has brought remarkable results. Some hills are beautiful pale pink, very large and long for a Seedling. Some look like the old peachblow; some large white, purple eyes; some round, pale red, 30 to 60 in a hill; some pale blue; some white, flat and 8 inches or more long; two hills of black potatoes, etc., etc. I never saw so many different colors and shapes. If they grow in same ratio another year, they will be the largest ever raised in this section.

W. M. Johnson, Jackson Co., Ill.

Harvested 130 Potatoes From Two Hills.

I got many distinct varieties from your Hybridized Potato Seed last season. From two hills I got 130 Potatoes. One kind was purple all through—a great curiosity. I am saving them all with much care.

Mrs. Clifford Potter, Wash. Co., N. Y.

Worth Its Weight in Gold.

Your Potato Seed is worth its weight in gold. I grew 115 different varieties from one packet. They are the finest I ever saw. I expect to make a lot of money out of them. C. E. Flint, Wash.

Best Eating Potato--Immensely Productive.

I selected the earliest and best of 30 Seedlings grown from your seed, planted them alongside Early Ohio, Early Rose, and Beauty of Liebron. They are now—July 12, fully ripe, while all the others are green. Are immensely productive—the best eating potato I have. I expect to have 200 bu. Jessie Green, La Salle Co., Ill.
